

YURI GABRIEL

✉ yuri.vincitore@gmail.com 🔄 yuri-g1 in yuri-g1

SUMMARY

Front-end developer with experience in JavaScript, TypeScript, React, and Next.js, with a parallel track in Quality Assurance using tools like Playwright. Multiple deliveries of complete landing pages and services such as: custom UI/UX design in Figma, scalable frontend architecture, Node.js backends, performance and SEO/AEO/GEO optimization, 3D web animation with Three.js and GSAP, and API testing. English (fluent), Portuguese (native).

EDUCATION

Currently Pursuing a B.S. in Software Engineering (Brazil) 2026 - 2030 (Expected)
English Course — Sociedade Brasileira de Cultura Inglesa (SBCI) (Brazil) Jul 2022 - Dec 2027
Level Plus 4 · Fluent speaker

EXPERIENCE

Vasonim (Bucharest, Romania) Jun 2024 - Aug 2026
Fullstack Developer

- Lead the end-to-end creation of landing pages and technological solutions for clients, from design through implementation.
- Custom, user-focused UI/UX designs, building scalable frontend architectures in Next.js, React, and TypeScript.
- Rigorous performance (Lighthouse) and responsiveness validations across different breakpoints and devices.
- Comprehensive SEO, AEO, and GEO optimizations with Google Search Console and Google Tag Manager.
- Build projects ranging from simple web architectures to complex 3D animations with Three.js and GSAP, and small Node.js backends.

Symetrisk (Oslo, Norway) Feb 2025 - Jun 2026
Front-end Developer

- Core frontend built by me, constructing three tailored interfaces for banks, loan borrowers, and credit scorers.
- Fetching and transforming backend data via API to calculate and display accurate financial metrics.
- Mobile responsiveness across all platforms despite a desktop-first focus.
- Simple video editing for app demonstrations at events and meetings
- Testing APIs related to permissions and response times, validating data correctness and calculation logic.

Langory (Oslo, Norway) Oct 2024 - Oct 2025
Quality Assurance & Front-end Developer

- UI responsiveness bugs resolved across the platform, plus a redesign of the old landing page.
- Redesign of interfaces according to target audience, distinct visual experiences for children by age or for teachers by theme.
- Validation of AI-generated children's stories for coherence, age-appropriateness, and accurate translations.
- Rigorous API and stress testing focused on permissions and system limits, tracking performance bottlenecks such as API response delays.

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js (SSR/SPA), Remix, Micro Frontends, Tailwind CSS, Three.js, GSAP, Framer Motion, Mapbox GL JS

Backend: Node.js, REST APIs, SQL, Content Management Systems (CMS, Contentful), OAuth 2.0, Google Cloud Platform (GCP)

Tooling: Git, GitHub, Figma, Vercel, Npm, Microsoft Office, Postman

Performance & Discovery: Lighthouse, SEO, AEO, GEO, Google Search Console, Google Tag Manager

Quality Assurance: Quality Control, REST API Testing, Playwright, Chrome DevTools, WCAG

Engineering Practices: Clean Code, SOLID, Scrum, Kanban, CI/CD, Design Patterns
