SUMMARY

I'm a Software Developer building production web applications with React, Next.js, Node.js and TypeScript for companies in Europe since 2023. I've delivered 10+ web solutions for clients of a Romanian agency, built the entire front-end of a Norwegian fintech lending platform for banks, and built interfaces for a Norwegian EdTech platform used by children and teachers. My work spans front-end and back-end, and my QA background means I ship software that is tested, accessible and fast. English (fluent), Portuguese (native).

EDUCATION

Currently Pursuing a B.S. in Software Engineering (Brazil) — 2026 - 2030 (Expected)

English Course — Sociedade Brasileira de Cultura Inglesa (SBCI) (Brazil) — Jul 2022 - Dec 2027

Level Plus 4 · Fluent speaker

EXPERIENCE

Vasonim (Bucharest, Romania · Remote) — Jan 2023 - Sep 2026

Full Stack Developer

- Delivered 10+ web solutions for international clients, from UI/UX design in Figma to production.
- Built e-commerce stores on Shopify for clients.
- Achieved Lighthouse scores of 90+ on every client website through performance optimization and responsive design.
- Built scalable front-end architectures with Next.js, React and TypeScript.
- Built Node.js back-ends and REST API integrations for client projects, including contact forms, webhooks and CMS integrations (Contentful).
- Created 3D and motion experiences with Three.js and GSAP.
- Implemented SEO, AEO and GEO strategies with Google Search Console and Google Tag Manager.

Symetrisk (Oslo, Norway · Remote) — Feb 2025 - Jun 2026

Front-end Developer

- Built the entire UI as the sole front-end developer in a 3-person team (front-end, back-end, QA).
- Developed 20+ screens across three role-based interfaces for banks, borrowers and credit scorers.
- Implemented debounced search and, with the back-end developer, server-side pagination to handle lists of 2,000+ users smoothly.
- Integrated REST APIs to calculate and display accurate financial metrics, and made the desktop-first platform fully responsive.
- Tested API permissions and response times, finding and reporting multiple permission flaws before launch.

Langory (Oslo, Norway · Remote) — Oct 2024 - Oct 2025

Quality Assurance & Front-end Developer

- Fixed UI responsiveness bugs across the platform and redesigned the landing page.
- Designed interfaces for two audiences: age-based experiences for children aged 5 to 12 and theme-based ones for teachers.
- Fixed accessibility issues, including the dyslexia-friendly reading mode and color themes.
- Validated AI-generated children's stories for coherence, age-appropriateness and accurate translations.
- Ran API and stress tests on permissions and system limits, tracking bottlenecks such as slow API responses.

SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js (SSR/SPA), Remix, Micro Frontends, Tailwind CSS, Three.js, GSAP, Framer Motion, Mapbox GL JS

Backend: Node.js, REST APIs, SQL, MySQL, Content Management Systems (CMS, Contentful), OAuth 2.0, Google Cloud Platform (GCP), Airtable, Webhooks, E-commerce (Shopify), RPA

Tooling: Git, GitHub, Figma, Vercel, Cloudflare, Npm, Postman, AI-Native Development (Claude Code, Cursor, Gemini CLI, Antigravity, v0, Lovable), LLM APIs

Performance & Discovery: Lighthouse, SEO, AEO, GEO, Google Search Console, Google Tag Manager

Quality Assurance: Quality Control, REST API Testing, Playwright, Chrome DevTools, WCAG

Engineering Practices: Clean Code, SOLID, Scrum, Kanban, CI/CD, Design Patterns

CERTIFICATIONS

Introduction to Cybersecurity: Cisco

Claude Academy: Model Context Protocol: Advanced Topics, Claude Code 101, Building Effective Human-Agent Teams (Beta), AI Fluency: Framework & Foundations — Anthropic

PROJECTS

SAP Validator: Node.js + Playwright automation that validates invoices in SAP using OCR (Tesseract.js) and pdftotext.

Logistics Scheduling System: Low-code system where users from multiple countries book truck deliveries at warehouses through a custom form that collects essential data upfront, speeding up the entire inbound process.

Snoozy: Chrome extension that tracks time per site, labels sites as productive or distracting, builds daily/weekly reports and offers a focus mode that blocks distractions.
